

Kitt Johnson X-act

The Magical Sound Circus – technical rider

Set-up: min. 2 hours

Stage: minimum width: 8 m – minimum depth: 6 m – minimum height: 4 m

Technical requirements: 220V

Black-out: not necessary, but no direct sunlight (glare) on stage.

A table, approx. 1.5x1m, and a chair.

1 strong adult to greet us on arrival, help with load-in and load-out, and to welcome the audience before the performance.

We would appreciate it if the venue is heated on our arrival.

Additional requirements at regular theatre venues

Power: 3 x 16A sockets (min)

6-8 fresnels to provide general illumination (4-5 fresnels as front light and 2-3 as back light)

We will bring our own mixer, which needs to be plugged into the venue's PA system.

A technician to set up, focus and run the lights.
